

Dyna-Tite[®]

FAST-LOCK[™]

Dyna-Tite Fast-Locks are similar to Cable Locks, but have a single way lock instead of a double lock like Cable Locks have. Each cable lock is designed for use with one specific wire size and have working load ranges that incorporate a 4:1 safety factor ratio. Fast-Locks lock onto a single hanging point and are to be used with round duct 24" or less. For ease of installation, Fast-Locks feature an easy release pin for simple adjustments without the use of tools.

To insure the safety and integrity of the suspension system use only Duro Dyne wire rope.

FDM6-WC2
10-75 lbs (5-34 kg)

FDM12-WC3
25-150 lbs (12-68 kg)

FDM18-WC4
25-250 lbs (12-114 kg)
