COIL CLEANER - FOAMING

A portable, non-acid, foam cleaner that blasts deep into air conditioner, heater, refrigeration and dryer coils to loosen and remove grease, dirt, lint and grime. Contains natural enzymes for continuous cleaning and breakdown of organic coil contaminants. May be flushed off with water or left on fins without rinsing. FACC helps maintain optimum unit efficiency and deodorizes as it cleans, leaving the area with a fresh clean scent. A strong directional spray helps force foam into coil air spaces. Then, the Bio-Enzymatic action removes stain and odors associated with mold and fungus.

- No Rinse
- Non-Acid
- No Harsh Fumes
- Improves Air Flow
- Reduces Energy Consumption

ITEM #	CODE	DESCRIPTION
5121	FACC	Coil Cleaner with Foaming Action

COIL CLEANER - SOLVENT BASED

A fast-drying, flush-action solvent that blasts grease, dirt, lint, and grime from air conditioner, heater, dryer, and refrigeration coils. Improves airflow and reduces power consumption. Helps maintain optimum unit efficiency. Requires no rinsing.

- Fast Drying
- Helps Reduce Energy Costs
- No Ozone Depleting Substances

ITEM #	CODE	DESCRIPTION
5123	SBCC	Solvent Based Coil Cleaner

STRIPPER

Galvanizing build-up is bad for job quality, production efficiency and profits. The Stripper is a degalvanizing agent that strips your machine of messy build up. It sprays on red for easy visibility. Simply Spray it on rollers of forming machines and press dies and the special ingredients get right to work and dissolve galvanized build up. Then high quality lubricants take over to keep precision machines running smoothly...at peak efficiency... day in, day out. The convenient 12 pound canister has a precise, powerful, long spray pattern.

ITEM #	CODE	DESCRIPTION
27147	Stripper	Degalvanizing & Lubricating Spray
5159	STRP12	12 lbs. Canister

1. Spray The Stripper at those points where galvanizing tends to build up on your machines. The special cleaning ingredients get right to work softening up deposits.
2. Under normal conditions, galvanizing build-up will loosen and flake off by itself after being sprayed with The Stripper. Then if required, remaining build-up can easily be removed by light scraping.
3. High Quality Lubricants then take over to keep precision machines running smoothly.

GLOVES
