### **DURO LOOP CABLE SLING**

The Duro Loop Cable Sling enhances the Dyna-Tite suspension system by the addition of a pre-looped cable end. Once the wire rope is pulled around the anchor point and through the looped end of the cable, it is already secured at one end, saving time at the jobsite. The remaining wire rope "drop" is passed through a channel in the Dyna-Tite Cable Lock. Then, the wire rope is either wrapped around the ductwork or inserted through a fastening point and back up into the second channel of the same cable lock. The locking teeth inside the cable lock engage the wire rope which secures the ductwork in place.

To ensure maximum safety, use only looped wire rope supplied by Duro Dyne with cable lock applications.

30237	LC25-18	1/8in X 25ft 3in Looped Cable	50 per carton

### **CABLE SADDLE**

Dyna-Tite Cable Saddle is used to protect spiral or rectangular ductwork from the abrasions of cable. The flexible saddle material is available in 25 foot rolls and is dispensed through an opening in the carton. The smooth lightweight construction provides easy use on the job site and allows for the saddle to be readily cut to length.
