

# SLOPE PINS™

## CTC Sloped Washer Pins

SMACNA specifications for insulation fastening require a combination of adhesive with mechanical fasteners to secure duct liner to the ductwork. Sloped Washer pins are low cost insulation fasteners designed to provide a strong mechanical anchor point for duct liner.

- Sloped Washer for a smooth transition from the insulation surface to the quilting depression.
- Consistent formed point for more uniform high strength welds.
- Smooth shank pin that easily penetrates through the insulation; even when used with manually operated pinspotting machines.
- High quality modestly priced Duro Dyne insulation fastener.

Another of the "World's Finest Insulation Fasteners", all Sloped Washer Pins have a smooth shank, consistent point and no burrs. Sloped Washer Pins are Available in bulk boxes.

### CTC Sloped Washer Pins

Are designed to be used with all Duro Dyne pinspotter models: FGMH, FG, RH, PBF, MF CTC.
