

FVF REGULATORS

FVF Regulators are available in two sizes for 1/4" shaft and 3/8" shaft base for a Hex Nut Regulator. These low profile regulators do not extrude much from the ductwork and are ideal for applications that require a tight squeeze. They also feature a wide base that fits securely to the ductwork and easily shows the damper position at a glance with the indication of 'open' and 'shut' on the base. It mounts easily on round or square ducts.

Regulators are often used in the field to adjust damper blades. Properly installing the correct regulator for your application can minimize air leakage and reduce rattle. Duro Dyne Air Regulation Hardware is all in accordance with SMACNA duct construction standards.

Item#	Code	Description	Quantity
6336	FVF14	1/4in Wide Base Hex Nut Regulator	10 Per Box
6337	FVF38	3/8in Wide Base Hex Nut Regulator	10 Per Box
