

HDJD DAMPER

Continuous rod round dampers for up to 4" W.G.

Balancing dampers for ductwork are critical to achieving effective system operation. While fairly simple in design, dampers often require labor that could be better utilized elsewhere. The Duro Dyne HDJD damper is an economical alternative to in shop damper fabrication.

FEATURES:

- 22 gauge galvanized steel blades
- High strength corrosion resistant rod
- Pre-assembled - no need for U bolts, rod clips, paddle bearings, rivets or welding
- 3/8" square rod extends 3 inches beyond the blade to accommodate up to 2 inch insulation wrap
- New & Improved Design! Dimples hold rod securely in place, while still allowing adjustment during damper assembly
- Compatible with Duro Dyne's ESO damper regulator assembly for quick installation on insulated duct
- Available in sizes from 4 inch to 24 inch diameter
- HDJD Dampers are available assembled or unassembled

New "dimples"
hold rod in place

ESO regulator
(sold separately)
